## VISIT REPORT

**Pest control operator:** James Austin Campbell

**Visit date:** 04/01/2021

**Report date:** 04/02/2021

### Building 7

I observed many drain flies in the Men's and Women's bathrooms in the East wing of building 7. I treated all 4 sink drains as well as a spot in the wall beneath toilet of the third stall of the Men's room with Hot Spot.

Signs were posted by Anna before I arrived.

Next visit: Reinspect bathrooms and reapply Hot Spot, if needed.

### Building 2

Upon Garry's request, I inspected another fly issue in the deli of building 2. I identified them as fruit flies. These flies are attracted to the food scraps I observed on the floor and caught in the drains. I treated the kitchen drains with Hot Spot.

Next visit: Reinspect drains and reapply Hot Spot, if needed.
