

Building 1

Conducted interior inspection. The insect monitoring traps had little to no activity, no need to replace. I did not find any other issues during my walk through. On the exterior, I found no insect activity or other issues.

With the exterior bait boxes I took before and after photos, cleaned out bait boxes as much as possible, replaced bait where necessary, locked and ensured bait boxes were secure, relabeled where necessary, replaced and re-baited snap traps in the parking garage.

Bait Station:

#2 - 60g replaced

#10 - 60g replaced

#9 - 60g replaced

#7 - 60g replaced

#1 - 60g replaced

Next service: Refresh rodent stations. Check monitoring traps.

Building 2

I checked all of the insect monitor traps. No Issues with the IMTs, no need to replace. Inspected light traps, no issues. On the exterior I found no new signs of insect issues.

With the exterior bait boxes I took before and after photos, cleaned out bait boxes as much as possible, replaced bait where necessary, locked and ensured bait boxes were secure, relabeled where necessary.

Bait Stations:

#6 60g replaced

#10 60g replaced

#9 60g replaced

#12 60g replaced

#14 60g replaced

#1 60g replaced

Next service: Replace sticky traps, if needed. Monitor light traps. Refresh rodent stations.

Building 3

I checked all the insect monitoring traps on the interior. No insects found.

No issues with the light trap. On the exterior, there were no additional insect concerns.

With the exterior bait boxes I took before and after photos, cleaned out bait boxes as much as possible, replaced bait where necessary, locked and ensured bait boxes were secure, relabeled where necessary.

Bait Stations:

#6 60g replaced

#8 60g replaced

#10 60g replaced

#11 60g replaced

#13 60g replaced

#14 60g replaced

#2 60g replaced

#3 60g replaced

Next service: Replace sticky traps, if needed. Refresh rodent stations. Check rodent trap for activity.

Building 6

Inspected interior. I checked fly light in the deli, only a couple of flies in there. No need to replace. Glue boards were clean save for one fly on one. No other issues reported or seen.

Next Service: Check glue trap and monitoring traps.

Building 7

Inspected interior. Checked fly light in the fire access room, lots of dead bodies still, but nothing on the fly light. No issues on other traps inside the building either.

Need to vacuum up the bodies of flies inside that fire access, but the issue seems to be subsiding for now.

Next service: Retreat pipe for fly issue, if needed. Check and replace traps, if needed.

Building 8

I inspected the IMTs in both kitchen areas, no issues on them. No signs of activity in the broom closet downstairs either. No exterior service.

Next service: check and replace monitoring traps, if needed.

Building 9

I inspected the interior monitoring traps and found no evidence of activity. No issues reported or exterior service.

Next service: check and replace monitoring traps, if needed.

Building 10

Interior inspection. IMT traps are looking great, only one spider on one of the traps.

Next Service: Check monitoring traps.

Trading Center

I inspected the interior. No issues around the Insect Monitoring Traps. No need to replace them today.

With the exterior bait boxes I took before and after photos, cleaned out bait boxes as much as possible, replaced bait where necessary, locked and ensured bait boxes were secure, relabeled where necessary.

Bait Stations:

#4 - 60g replaced
#5 - 60g replaced
#6 - 60g replaced
#7 - 60g replaced
#8 - 60g replaced
#9 - 60g replaced
#10 -60g replaced

Next service: Refresh rodent stations. Check monitoring stations.
