

Building 1

No issues around the Insect Monitoring Traps. No need to replace them today.

With the exterior bait boxes I took before and after photos, cleaned out bait boxes as much as possible, replaced bait where necessary, locked and ensured bait boxes were secure, relabeled where necessary, replaced and re-baited snap traps in the parking garage.

Bait Station:

Bait box #7 - 3 blocks replaced
Bait box #10 - 3 blocks replaced
Bait box #11 - 3 blocks replaced
Bait box #12 - 3 blocks replaced
Bait box #14 - 3 blocks replaced
Bait box #15 - 3 blocks replaced
Bait box #1 - 3 blocks replaced
Bait box #2 - 3 blocks replaced
Bait box #4 - 3 blocks replaced
Bait box #5 - 3 blocks replaced

Next service: Refresh rodent stations. Check monitoring traps. Quarterly insect spray.

Building 2

No issues around the Insect Monitoring Traps besides the light trap in the storage room. No need to replace the others today.

With the exterior bait boxes I took before and after photos, cleaned out bait boxes as much as possible, replaced bait where necessary, locked and ensured bait boxes were secure, relabeled where necessary.

Bait Stations:

Bait box #6 - 3 blocks replaced
Bait box #10 - 3 blocks replaced

Bait box #11 - 3 blocks replaced

Bait box #13 - 3 blocks replaced

Bait box #14 - 3 blocks replaced

Bait box #15 - 3 blocks replaced

Bait box #1 - 3 blocks replaced

Next service: Replace sticky traps, if needed. Refresh rodent stations. Check rodent trap for activity. Quarterly insect spray.

Building 6

Checked fly light in the deli, only a couple of flies on there, no need to replace. Glue boards were clean save for one fly on one. No other issues reported or seen.

Next Service: Check glue trap and monitoring traps.

Building 7

Checked fly light in the fire access room, nothing on the fly light. No issues on other traps inside the building either.

Ants around the back loading dock area have dispersed, lots of dead ants around the walls there.

Next service: Retreat pipe for fly issue, if needed. Check and replace traps, if needed.

Building 8

Checked IMTs in both kitchen areas, no issues on them. No signs of activity in the broom closet downstairs either.

Next service: check and replace monitoring traps, if needed.

Building 9

Checked the IMTs, no issues and no need to replace at this time. No issues reported at this time

Next service: check and replace monitoring traps, if needed.

Building 10

Interior inspection. Two IMT traps in the kitchen by the back door needed replacing. No new signs of issues or entry points.

Next Service: Check monitoring traps.

Trading Center

Inspected the interior. No issues around the Insect Monitoring Traps. No need to replace them today.

With the exterior bait boxes I took before and after photos, cleaned out bait boxes as much as possible, replaced bait where necessary, locked and ensured bait boxes were secure, relabeled where necessary.
